

## Designing Your S/4 Future Without AI?

*That's Like Building a Smart Home Without Electricity.*

Why spend millions mapping outdated, manual processes with armies of consultants – only to bolt on AI later and hope it fits? Your SAP S/4HANA transformation should be intelligent from the blueprint up. Wire in AI from day one, and turn your system into a self-optimizing, insight-driven enterprise. Don't retrofit the future – design it smart.

### ARE YOU...

- Still living in a legacy setup - running a heavily customized or fragmented ECC landscape, and unsure how to wire in the intelligence needed for the future?
- In the design phase of your S/4HANA journey, and looking to embed AI into the blueprint from day one – like installing smart wiring before the walls go up?
- Already live on S/4HANA, but finding that without the right AI integration, your system feels more like a digital shell than a truly intelligent home?

Wherever you are on the S/4HANA journey, the goal is the same: to build a smart, connected enterprise - where intelligence, automation, and agility are wired in from the start.

### WHY INNOVERV...

Just like a smart home needs a central system to connect and optimize every device, INNOVERV brings intelligence and integration to your SAP S/4HANA transformation.

- **We Have Deep AI & SAP Expertise:** With 100+ SAP programs delivered, we know how to solve real-world challenges with practical, scalable AI.
- **We Develop Tailored Solutions:** Every enterprise has a unique blueprint. Our AI strategies align with your architecture to unlock measurable value.
- **We Ensure Safety & Security:** We embed responsible AI principles from the ground up - ensuring your intelligent enterprise is powerful, trusted, and future-ready.

### WHAT WILL WE DO FOR YOU...

Think of your SAP S/4HANA transformation like building a smart home - every system must be connected, automated, and intelligently managed. INNOVERV guides you through three key phases:

- 1 Discovery:** Wherever you are on your SAP journey, we assess your landscape and identify where AI can deliver the most value - enhancing automation, integration, and intelligence.
- 2 Targeted Solution Blueprint:** We design a tailored roadmap, combining native SAP and custom AI solutions to ensure your enterprise is wired for performance and scalability.
- 3 Executive Buy-In & Activation:** We present a clear, value-led case to your leadership - securing alignment and momentum for your intelligent transformation.

This isn't just a system upgrade - it's the foundation of a smarter, more connected enterprise.

You will have access to our elite pool of experts who will guide and coach you.

Sound good? Get in touch! We look forward to working with you!
