

TO 'RISE' WITH SAP OR NOT? THE DILEMMA FACING BUSINESSES TODAY

RISE with SAP is more than a technical shift, it's a strategic leap toward innovation, compliance, and agility. SAP S/4HANA Cloud offers an all-in-one transformation platform, combining ERP, infrastructure, and services. It simplifies operations, enhances security, and enables faster access to SAP innovations like AI and automation. But not every organization is ready to RISE, and timing is critical. With the 2027 deadline approaching, the question isn't whether to RISE, it's how to do it right, aligned to your regulatory needs, operational priorities, and future growth ambitions.

ARE YOU...

- Stuck on an aging ECC platform and questioning whether S/4HANA Cloud is the clean break your organization needs?
- Operating across multiple ECC instances or fragmented integrations, and struggling to unify systems?
- Seeking to align IT and business functions on a modern, scalable, intelligent ERP platform?
- Concerned that a basic "lift-and-shift" may not deliver real transformation?

You're not alone. Many organizations at all maturity levels are facing these same crossroad decisions.

WHY CHOOSE US...

At Innoverv, we don't just advise, we help you write the success story of your digital transformation using SAP S/4 HANA Cloud

- **Unbiased & Independent:** We focus solely on your success. We're not tied to hyper-scaler incentives or SAP reseller commissions
- **Deep SAP Expertise:** We advise on S/4HANA transformations across industries with a senior team, including an ex-President of SAP in our advisory team
- **End-to-End Credibility:** This isn't theory – we bring cross-functional knowledge and RISE-specific execution capability that is proven

ACROSS THE NEXT 8-12 WEEKS WE WILL...

1

ASSESS READINESS & RISK

Evaluate your business readiness, including regulatory requirements and risk readiness.

2

BUILD THE BUSINESS CASE

Develop a fact-based business case covering total cost of ownership, innovation potential, and RISE vs. non-RISE scenarios across key use cases.

3

DEFINE THE RISE ROADMAP

Facilitate targeted workshops to clarify RACI, SLAs, and security responsibilities, and co-create a tailored migration plan including architecture, timeline, validation strategy, cost and resource modeling.

You will have access to our elite pool of experts who will guide and coach you.

Sound good? Get in touch! We look forward to working with you!
